Doppler Applications in LEO Satellite Communication Systems (The Springer International Series in Engineering and Computer Science) Irfan Ali, Pierino G. Bonanni, Naofal Al-Dhahir, John E. Hershey
Doppler Applications in LEO Satellite Communication Systems develops and presents an important class of techniques useful in the construction of little Low Earth Orbit (LEO) satellite communication systems. It centers on the very significant Doppler shift that attends communications through a LEO satellite and shows how this phenomenon can be exploited for an unexpected benefit. The techniques taught in the book are expected to be particularly attractive to system engineers because ground-based transceivers must generally compensate for the large Doppler component and therefore the necessary receiver processing loops are often already in place and expensed.

This volume starts with a recounting of the characteristics of a LEO satellite and its orbit. The 2nd chapter addresses the LEO orbital geometry and reviews the Doppler effect attending LEO communications. Chapter three is focused on the important task of estimating the Doppler at a ground terminal. Appropriate signal processing algorithms are reviewed. Chapter four is concerned with predicting LEO satellite visibility. Chapters five and six are, respectively, devoted to the use of the significant LEO Doppler as an aid in a new traffic flow control protocol and as an aid for effecting communications power control. The last chapter describes MATLAB® based analysis.

Doppler Applications in LEO Satellite Communication Systems provides a thorough review of the LEO Doppler phenomenon.

From reader reviews:

Chris Bynum:

People live in this new day time of lifestyle always try to and must have the extra time or they will get wide range of stress from both day to day life and work. So , whenever we ask do people have extra time, we will say absolutely sure. People is human not really a robot. Then we ask again, what kind of activity are there when the spare time coming to a person of course your answer will unlimited right. Then do you try this one, reading guides. It can be your alternative throughout spending your spare time, the actual book you have read is actually Doppler Applications in LEO Satellite Communication Systems (The Springer International Series in Engineering and Computer Science).

Mary Jones:

As we know that book is significant thing to add our know-how for everything. By a book we can know everything you want. A book is a set of written, printed, illustrated as well as blank sheet. Every year has been exactly added. This e-book Doppler Applications in LEO Satellite Communication Systems (The Springer International Series in Engineering and Computer Science) was filled about science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has several feel when they reading a new book. If you know how big selling point of a book, you can truly feel enjoy to read a reserve. In the modern era like currently, many ways to get book which you wanted.

Tammi Rosado:

That guide can make you to feel relax. This specific book Doppler Applications in LEO Satellite Communication Systems (The Springer International Series in Engineering and Computer Science) was vibrant and of course has pictures around. As we know that book Doppler Applications in LEO Satellite Communication Systems (The Springer International Series in Engineering and Computer Science) has many kinds or category. Start from kids until teens. For example Naruto or Investigator Conan you can read and feel that you are the character on there. Therefore not at all of book are usually make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book for you and try to like reading which.

Gary Wilson:

A number of people said that they feel weary when they reading a reserve. They are directly felt this when they get a half elements of the book. You can choose typically the book Doppler Applications in LEO Satellite Communication Systems (The Springer International Series in Engineering and Computer Science) to make your own personal reading is interesting. Your own skill of reading talent is developing when you similar to reading. Try to choose easy book to make you enjoy to read it and mingle the opinion about book and looking at especially. It is to be 1st opinion for you to like to wide open a book and learn it. Beside that the guide Doppler Applications in LEO Satellite Communication Systems (The Springer International Series

in Engineering and Computer Science) can to be your brand new friend when you're experience alone and confuse with the information must you're doing of this time.
