Linear Algebraic Groups (Graduate Texts in Mathematics) Armand Borel

This revised, enlarged edition of Linear Algebraic Groups (1969) starts by presenting foundational material on algebraic groups, Lie algebras, transformation spaces, and quotient spaces. It then turns to solvable groups, general properties of linear algebraic groups, and Chevally's structure theory of reductive groups over algebraically closed groundfields. It closes with a focus on rationality questions over non-algebraically closed fields.

From reader reviews:

Clarence Guyer:

Hey guys, do you really wants to finds a new book to learn? May be the book with the concept Linear Algebraic Groups (Graduate Texts in Mathematics) suitable to you? The particular book was written by renowned writer in this era. The actual book untitled Linear Algebraic Groups (Graduate Texts in Mathematics)is one of several books that will everyone read now. That book was inspired lots of people in the world. When you read this guide you will enter the new shape that you ever know before. The author explained their plan in the simple way, consequently all of people can easily to understand the core of this publication. This book will give you a great deal of information about this world now. To help you see the represented of the world in this particular book.

Jennifer Fields:

Linear Algebraic Groups (Graduate Texts in Mathematics) can be one of your beginning books that are good idea. All of us recommend that straight away because this publication has good vocabulary that can increase your knowledge in vocab, easy to understand, bit entertaining however delivering the information. The author giving his/her effort to set every word into satisfaction arrangement in writing Linear Algebraic Groups (Graduate Texts in Mathematics) yet doesn't forget the main place, giving the reader the hottest and based confirm resource data that maybe you can be one among it. This great information can easily drawn you into completely new stage of crucial thinking.

Dora Dickey:

Reading a book to get new life style in this 12 months; every people loves to examine a book. When you go through a book you can get a lots of benefit. When you read books, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you want to get information about your study, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, such us novel, comics, and soon. The Linear Algebraic Groups (Graduate Texts in Mathematics) offer you a new experience in examining a book.

Richard Kowalski:

That publication can make you to feel relax. That book Linear Algebraic Groups (Graduate Texts in Mathematics) was bright colored and of course has pictures on the website. As we know that book Linear Algebraic Groups (Graduate Texts in Mathematics) has many kinds or style. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and believe you are the character on there. Therefore not at all of book are usually make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading in which.
