Great teaching is not just a matter of talent or creativity or passion. Teachers are made, not born, and great teachers know why they do what they do in their classrooms. They do it strategically and purposefully based on technique. *Teach on Purpose!* demonstrates a high-quality research-based and practical approach to teaching that focuses on how to use data about students' identities, experiences, and knowledge to design responsive curriculum and instruction that ensures learning. The authors provide secondary school teachers with scientifically proven strategies for creating learning environments that increase student motivation, engagement, and academic achievement. The text features model units authored and taught by practicing classroom teachers in math, science, social studies, and language arts to demonstrate key principles that can be used in any classroom to be a true professional educator. *Teach on Purpose!* empowers teachers across all content areas to create meaningful teaching and learning experiences together with their students for the success of all.
