## **Echo Signal Processing (The Springer International Series in Engineering and Computer Science)**

Dennis W. Ricker

This book presents basic and advanced topics in the areas of signal theory and processing as applied to acoustic echo-location (sonar). It is written at the advanced undergraduate or graduate level, and assumes that the reader is conversant with the concepts and mathematics associated with introductory graduate courses in signal processing such as linear and complex algebra, Fourier analysis, probability, advanced calculus, and linear system theory. The material is presented in a tutorial fashion as a logical development starting with basic principles and leading to the development of topics in detection and estimation theory, waveform design, echo modeling, scattering theory, and spatial processing. Examples are provided throughout the book to illustrate important concepts and especially important relationships are boxed. The book addresses the practical aspects of receiver and waveform design, and therefore should be of interest to the practicing engineer as well as the student. Although much of the book is applicable to the general echo-location problem that includes radar, its emphasis is on acoustic echo location especially in regard to time mapping and the wideband or wavelet description of Doppler. Introductory signal theory material is included in the first chapter to provide a foundation for the material covered in the later chapters. A consistent notational convention is observed throughout the book so that the various mathematical entities are readily identified. This is described in the glossary and symbol list.

### **From reader reviews:**

#### **Betty Walsh:**

Book is to be different per grade. Book for children until adult are different content. As it is known to us that book is very important for us. The book Echo Signal Processing (The Springer International Series in Engineering and Computer Science) ended up being making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The reserve Echo Signal Processing (The Springer International Series in Engineering and Computer Science) is not only giving you far more new information but also for being your friend when you feel bored. You can spend your personal spend time to read your publication. Try to make relationship together with the book Echo Signal Processing (The Springer International Series in Engineering and Computer Science). You never really feel lose out for everything in the event you read some books.

#### **Helen Tate:**

Information is provisions for anyone to get better life, information today can get by anyone with everywhere. The information can be a know-how or any news even an issue. What people must be consider if those information which is from the former life are challenging to be find than now's taking seriously which one is acceptable to believe or which one the resource are convinced. If you receive the unstable resource then you buy it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Echo Signal Processing (The Springer International Series in Engineering and Computer Science) as the daily resource information.

#### **Kathryn Botello:**

The guide with title Echo Signal Processing (The Springer International Series in Engineering and Computer Science) contains a lot of information that you can learn it. You can get a lot of help after read this book. This book exist new understanding the information that exist in this e-book represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you in new era of the glowbal growth. You can read the e-book on the smart phone, so you can read this anywhere you want.

#### **Pilar Porter:**

What is your hobby? Have you heard that question when you got pupils? We believe that that query was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. So you know that little person similar to reading or as reading become their hobby. You need to know that reading is very important along with book as to be the thing. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You discover good news or update regarding something by book. A substantial number of sorts of books that can you decide to try be your object. One of them is actually Echo Signal Processing (The Springer International Series in Engineering and Computer Science).
