Ethiopia is one of the poorest countries in the world with a per capita income of just above US\$100. With such a low average income, poverty is of course widespread, so understanding the causes of poverty is of utmost importance, but until recently very little household-data has been available. This study deals with many aspects of poverty and income-distribution in Ethiopia, providing a wealth of information on household-income and its determinants. The book is of interest both to academics working on poverty analysis and to policy makers and donors collaborating with Ethiopia.
