The Book of Jubilees, Translated from the Ethiopic (Classic Reprint) Rev. George Schodde

One of the most marked features of theological research in our day and decade is the intense interest which characterizes the work in biblical theology, technically so called, and in this department no auxiliary branch has been more productive of good results than has been that discipline called History of New Testament Times, or the study of the times of Christ as to their religious, moral, and social features. The aim of such study is to reproduce, as far as possible, the exact picture of Christ's earthly career in the midst of all the agencies which influenced him and upon which he exerted his influence; in other words, to understand Christ's words and works with their true historical background and surroundings. It is a line of investigation that has produced, indirectly, such masterpieces as Weber's *System der altsynagogalen palästinischen Theologie* (Leipzig, 1880), and, directly, such as Edersheim's *Life and Times of Jesus the Messiah*, as also the two *Neu Testamentliche Zeitgeschichten*, of Schürer and Hausrath, as well as many other works, smaller in dimensions and more closely circumscribed in scope, while the spirit and method of this research is felt in every fibre of the leading exegetical and historical works on biblical subjects. The object of all this study is to produce an accurate and truly historical picture of Christ and Christianity. In the pursuit of this aim the Book of Jubilees has a not unimportant mission.
