Applied Computational Statistics in Longitudinal Research

Michael J. Rovine, Alexander von Eye

Applied Computational Statistics in Longitudinal Research Michael J. Rovine, Alexander von Eye New sophisticated data analytic strategies have become available to longitudinal researchers, but while information regarding the theory of these methods is available, that theory often does not help the user implement the strategy. Applied Computational Statistics in Longitudinal Research is designed to assist the user to actually run and interpret the results of many of these analytic strategies. Each chapter in the book deals with a different technique and the discussion begins with a summary of the procedure. An example including both the setup of the program and an annotated output are carefully explained. Unlike many other books on these topics, this book helps the user to quickly and easily apply the material to the computer. It can either be used as a companion to the two-volume Statistical Methods in Longitudinal Research (edited by von Eye, Academic Press, September, 1990) or alone to illustrate the applications of statistical methods that can be used in psychology, sociology, medicine, education, and engineering.

Key Features
* Four groups of techniques are discussed:
* General techniques in data analysis
* Methods for structuring change
* Time series modes
* Techniques for analyzing categorical data
Examples of these techniques are presented in a four-step manner:
* General summary of each method
* An outline of computational procedures, including a brief description of the software used
* An annotated example is presented, including the selected data set, its input method, the program for generating the solution, and a portion of the output
* A discussion of results

From reader reviews:

Irma Patterson:

Within other case, little folks like to read book Applied Computational Statistics in Longitudinal Research. You can choose the best book if you appreciate reading a book. Providing we know about how is important any book Applied Computational Statistics in Longitudinal Research. You can add information and of course you can around the world by the book. Absolutely right, due to the fact from book you can know everything! From your country until eventually foreign or abroad you will find yourself known. About simple issue until wonderful thing you may know that. In this era, we could open a book as well as searching by internet system. It is called e-book. You can utilize it when you feel weary to go to the library. Let's learn.

Mark Jones:

This Applied Computational Statistics in Longitudinal Research tend to be reliable for you who want to be considered a successful person, why. The key reason why of this Applied Computational Statistics in Longitudinal Research can be one of the great books you must have is actually giving you more than just simple looking at food but feed a person with information that maybe will shock your earlier knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions at e-book and printed people. Beside that this Applied Computational Statistics in Longitudinal Research giving you an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we know it useful in your day pastime. So , let's have it and revel in reading.

Madelyn McDowell:

Hey guys, do you desires to finds a new book to read? May be the book with the concept Applied Computational Statistics in Longitudinal Research suitable to you? Typically the book was written by popular writer in this era. The particular book untitled Applied Computational Statistics in Longitudinal Researchis the one of several books which everyone read now. This specific book was inspired a number of people in the world. When you read this e-book you will enter the new dimensions that you ever know ahead of. The author explained their concept in the simple way, and so all of people can easily to know the core of this e-book. This book will give you a large amount of information about this world now. To help you see the represented of the world on this book.

Marlyn Melia:

What is your hobby? Have you heard in which question when you got learners? We believe that that issue was given by teacher for their students. Many kinds of hobby, All people has different hobby. And you know that little person including reading or as reading through become their hobby. You have to know that reading is very important and also book as to be the matter. Book is important thing to increase you knowledge, except your own teacher or lecturer. You will find good news or update concerning something by book. A substantial number of sorts of books that can you decide to try be your object. One of them is this Applied

Computational Statistics in Longitudinal Research.
