Robot Motion and Control 2011 (Lecture Notes in Control and Information Sciences)

Robot Motion and Control 2011 (Lecture Notes in Control and Information Sciences)

Robot Motion Control 2011 presents very recent results in robot motion and control. Forty short papers have been chosen from those presented at the sixth International Workshop on Robot Motion and Control held in Poland in June 2011. The authors of these papers have been carefully selected and represent leading institutions in this field.

The following recent developments are discussed:

Design of trajectory planning schemes for holonomic and nonholonomic systems with optimization of energy, torque limitations and other factors.

New control algorithms for industrial robots, nonholonomic systems and legged robots.

Different applications of robotic systems in industry and everyday life, like medicine, education, entertainment and others.

Multiagent systems consisting of mobile and flying robots with their applications

The book is suitable for graduate students of automation and robotics, informatics and management, mechatronics, electronics and production engineering systems as well as scientists and researchers working in these fields.

From reader reviews:

Ann Fout:

The book Robot Motion and Control 2011 (Lecture Notes in Control and Information Sciences) gives you the sense of being enjoy for your spare time. You may use to make your capable considerably more increase. Book can for being your best friend when you getting pressure or having big problem along with your subject. If you can make looking at a book Robot Motion and Control 2011 (Lecture Notes in Control and Information Sciences) to get your habit, you can get much more advantages, like add your own personal capable, increase your knowledge about many or all subjects. You may know everything if you like open and read a reserve Robot Motion and Control 2011 (Lecture Notes in Control and Information Sciences). Kinds of book are several. It means that, science reserve or encyclopedia or others. So , how do you think about this book?

Eric Alaniz:

Playing with family inside a park, coming to see the sea world or hanging out with pals is thing that usually you could have done when you have spare time, and then why you don't try thing that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Robot Motion and Control 2011 (Lecture Notes in Control and Information Sciences), it is possible to enjoy both. It is excellent combination right, you still need to miss it? What kind of hang type is it? Oh can occur its mind hangout people. What? Still don't get it, oh come on its known as reading friends.

David McMillian:

As a pupil exactly feel bored in order to reading. If their teacher expected them to go to the library or to make summary for some guide, they are complained. Just very little students that has reading's heart or real their interest. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that studying is not important, boring along with can't see colorful images on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Robot Motion and Control 2011 (Lecture Notes in Control and Information Sciences) can make you sense more interested to read.

Ana Smith:

What is your hobby? Have you heard which question when you got pupils? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And you also know that little person just like reading or as reading become their hobby. You must know that reading is very important along with book as to be the issue. Book is important thing to add you knowledge, except your personal teacher or lecturer. You discover good news or update in relation to something by book. A

substantial number of sorts of books that can you choose to adopt be your object. One of them is actually Robot Motion and Control 2011 (Lecture Notes in Control and Information Sciences).
