Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics)

Gerard Buskes, Arnoud van Rooij

Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) Gerard Buskes, Arnoud van Rooij

gentle introduction to the subject, leading the reader to understand the notion of what is important in topology with regard to geometry. Divided into three sections - The line and the plane, Metric spaces and Topological spaces -, the book eases the move into higher levels of abstraction. Students are thereby informally assisted in learning new ideas while remaining on familiar territory. The authors do not assume previous knowledge of axiomatic approach or set theory. Similarly, they have restricted the mathematical vocabulary in the book so as to avoid overwhelming the reader, and the concept of convergence is employed to allow students to focus on a central theme while moving to a natural understanding of the notion of topology. The pace of the book is relaxed with gradual acceleration: the first nine sections form a balanced course in metric spaces for undergraduates while also containing ample material for a two-semester graduate course. Finally, the book illustrates the many connections between topology and other subjects, such as analysis and set theory, via the inclusion of "Extras" at the end of each chapter presenting a brief foray outside topology.

From reader reviews:

Jennifer Garza:

Book will be written, printed, or outlined for everything. You can recognize everything you want by a guide. Book has a different type. We all know that that book is important factor to bring us around the world. Close to that you can your reading skill was fluently. A book Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) will make you to end up being smarter. You can feel considerably more confidence if you can know about everything. But some of you think that open or reading a new book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you searching for best book or ideal book with you?

Eugene Barnum:

Hey guys, do you desires to finds a new book to see? May be the book with the subject Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) suitable to you? The book was written by famous writer in this era. The book untitled Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) is the main of several books this everyone read now. This kind of book was inspired lots of people in the world. When you read this guide you will enter the new dimension that you ever know previous to. The author explained their plan in the simple way, and so all of people can easily to comprehend the core of this e-book. This book will give you a wide range of information about this world now. To help you to see the represented of the world in this particular book.

Burton Zinn:

Many people spending their time frame by playing outside together with friends, fun activity with family or just watching TV all day every day. You can have new activity to spend your whole day by looking at a book. Ugh, you think reading a book can really hard because you have to take the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Smart phone. Like Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) which is finding the e-book version. So , try out this book? Let's see.

Willie Alford:

Reading a publication make you to get more knowledge as a result. You can take knowledge and information originating from a book. Book is prepared or printed or outlined from each source this filled update of news. In this particular modern era like today, many ways to get information are available for anyone. From media social such as newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just trying to find the Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) when you required it?
