Geopositioning and Mobility (Iste)

Geopositioning and Mobility (Iste)

This book presents a general overview of the applications and use of geopositioning and GNSS for assisting the supervision and management of mobile terrestrial professions, information, traffic regulation, multimodal information, pedestrian mobility and indoor geopositioning, etc. It especially focuses on the field of mobility and terrestrial transport, the automotive industry and tourism (on foot, by bicycle or motorcycle, by car, by professional vehicles or by public transport, etc.). This book explores the many possibilities, developmental and organizational factors, as well as new paradigms, which will contribute to an essential part of GNSS's civil economy, especially to Galileo in the mid-term and to Egnos in the short-term.

Several of GNSS's integration structuring aspects in sustainable terrestrial mobilities will be analyzed; for example in terms of system architecture, data safety or legal constraints. Numerous diverse points of view will be presented regarding subjects such as dynamic cartography and new computing architectures of: mobility systems, interconnection, service quality, regulation or supervision functions of individual freedoms.

Contents

Foreword, Matthias Ruete.

1. The Geopositioning Concept, Yves Alexandre.
2. Functions and Performance of the Egnos System, Jérôme Legenne and Daniel Brocard.
3. Information, Modeling and Traffic Reconstruction, Arnaud De La Fortelle, Jean-Marc Lasgouttes and Fabien Moutarde.
4. Geopositioning and Legal Issues, Thierry Piette-Coudol.
5. Location-based Services: Platforms and Applications, Wafaa Ait-Cheik-Bihi, Ahmed Nait-Sidi-Moh, Mohamed Bakhouya, Jaafer Gaber and Maxime Wack.
6. Geofencing, Fabrice Reclus.
7. Pedestrian Navigation for the Benefit of Mobility, Pierre-Yves Gillieron, Véronique Chazal, Michael Flamm, Dominique Von Der Mühl and Monique Ruzicka-Rossier.
8. The Application of Satellite Positioning Systems in Travel Analysis, Patrick Gendre, Alexis Bacelar and Philippe Marchal.

About the Authors

Ahmed Nait-Sidi-Moh is Associate Professor of Industrial Engineering and Computer Engineering at the University of Picardie Jules Verne, St Quentin, France. His research interests include modeling, analysis of discrete event systems, performance evaluation and optimization, routing policies, scheduling and interoperability for service composition.

Mohamed Bakhouya is a senior research scientist at Aalto University, Finland. His research interests include various aspects on the design, validation, implementation, performance evaluation and analysis of distributed systems, architectures, protocols and services.

Jaafer Gaber is Associate Professor of Computational Sciences and Computer Engineering at the University of Technology of Belfort-Montbéliard, France. His research interests include ubiquitous and pervasive computing, distributed systems, geopositioning and mobility, security and experimental performance evaluations.

Maxime Wack is Associate Professor of Computational Sciences and Computer Engineering at the University of Technology of Belfort-Montbéliard, France. He heads the Geopositioning, Embedded Systems

and Mobility (GSEM) team. His research interests include intelligent transportation systems, security, digital signature and certification, location-based services and distributed systems.

From reader reviews:

Johnna Chapin:

Have you spare time for a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a stroll, shopping, or went to typically the Mall. How about open or read a book entitled Geopositioning and Mobility (Iste)? Maybe it is being best activity for you. You know beside you can spend your time together with your favorite's book, you can better than before. Do you agree with it is opinion or you have additional opinion?

Helen Williams:

Do you have something that you prefer such as book? The book lovers usually prefer to select book like comic, short story and the biggest some may be novel. Now, why not striving Geopositioning and Mobility (Iste) that give your pleasure preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the means for people to know world better then how they react when it comes to the world. It can't be claimed constantly that reading routine only for the geeky man or woman but for all of you who wants to be success person. So , for all of you who want to start studying as your good habit, it is possible to pick Geopositioning and Mobility (Iste) become your starter.

Kathy Davis:

The book untitled Geopositioning and Mobility (Iste) contain a lot of information on that. The writer explains the woman idea with easy method. The language is very easy to understand all the people, so do not really worry, you can easy to read the item. The book was authored by famous author. The author will bring you in the new time of literary works. You can easily read this book because you can keep reading your smart phone, or device, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and also order it. Have a nice learn.

Sherry Francis:

As we know that book is vital thing to add our expertise for everything. By a reserve we can know everything we would like. A book is a list of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This guide Geopositioning and Mobility (Iste) was filled concerning science. Spend your free time to add your knowledge about your scientific research competence. Some people has various feel when they reading some sort of book. If you know how big selling point of a book, you can experience enjoy to read a reserve. In the modern era like at this point, many ways to get book you wanted.
