Fictional Death and Scientific Truth: The Truth-Value of Science in Contemporary Forensic Crime Fiction Kerstin Bergman

In this article, the author explores the relationship between science and truth in forensic crime fiction by analysis of narrative and media-specific constituents of CSI: Crime Scene Investigation (2000-) and Patricia Cornwell's *The Scarpetta Factor* (2009). Despite the different media, both are found to establish a strong bond between science and truth, and readers/viewers are encouraged to assume that this also is the case in the external world.

This article originally appeared in *Clues: A Journal of Detection*, Volume 30, Issue 1.
