**Critical Political Studies: Debates and Dialogues from the Left** Abigail B. Bakan, Eleanor MacDonald

A collective picture of modern capitalism suggests that economic prospects, political costs and implications for human development and freedom under this system are grim indeed. However the possibility of an alternative viewpoint, and an alternative system, provide grounds for optimism. The authors of this title challenge the neo-liberal, pro-market ideology that has arisen in the age of the so-called post-communist new world order, wrestling with the implications of globalization, democratization and the politics of radical social change. Written as a tribute to the remarkable intellectual career of Colin Leys, the debates in this book deal with some of the most pressing problems confronting the majority of citizens in both first world and third world contexts. Their contributions provide the confidence to pursue new possibilities that permit a more optimistic, if critical, outlook. Topics covered include contemporary debates about globalization and the nation state, African development, prospects for British socialism after Blair, social movements and current issues in political and social theory.
