## **Charles Darwin: A Celebration of His Life and Legacy** James T. Bradley

Charles Darwin (1809-1882) changed the world forever with his 1859 publication of *On the Origin of Species by Means of Natural Selection*. *Darwin: A Celebration of His Controversial Life and Legacy* is an anthology of critical writings that grew out of a lecture series, hosted by Auburn University, held on the occasion of the 200th anniversary of Darwin's birth and the 150th anniversary of the first edition of his most famous book.

Ideas in *The Origin of Species* reordered the biological sciences forever, spawned new disciplines including evolutionary psychology, sociobiology, and evolutionary developmental biology, became foundational for modern biomedical research and practice, inspired new literature and literary criticism, were misused by 20th-century eugenicists and social Darwinists, traumatized persons with certain theological views, and continue to alter humankind's view of itself and its place in the world. The 17 contributors to this anthology tell an interdisciplinary story of Charles Darwin the person, Darwin's work and world-altering ideas, and Darwin's legacy.
