95% of Step 2 consists of clinical vignettes, and this exciting new review series presents a wealth of "guaranteed to be on the exam" clinical vignettes for Step 2 preparation to give the reader a clear-cut advantage. It is unique among case-based series in giving greater focus to high-yield information. The cases and accompanying images faithfully replicate the format of the case encounters presented in Step 2, and key points and important Step 2 "buzzwords" are highlighted for each case. The approach is simple and focused without leaving out any important information. Plus, the format gives readers the opportunity to guess the answer to the case before it is revealed and to postulate on which tests to order, what therapy to give and what to "watch out for" in the condition presented.
