St. Cyril of Alexandria's Metaphysics of the Incarnation (Studies in Church History) Sergey Trostyanskiy

Cyril of Alexandria is one of the major intellectuals of the early Byzantine Christian world. His approach to Christ is at the core of the classical Christian tradition, however, because his works were not translated into English in the post-Reformation environment, the precise implications of his "science of Christ" have been extensively misunderstood. This work seeks to reposition Cyril in the precise philosophical context to which he belonged, seeking, as he did, for a deliberate bridge-building between ecclesiastical biblical presuppositions and the semantic terms central to the Late Antique philosophical Academy, with which he understands the Church must communicate. This book seeks to lay bare the fundamental philosophical axioms of Cyril's metaphysics of the Incarnation. To illuminate this, it investigates the fifth-century curriculum of metaphysical studies as followed in the academies of both Alexandria and Athens. Common to both Cyril and his Hellene contemporaries are the terms of theological speculation prevalent in the Commentaries on the *Parmenides*. This monograph applies the schema of theological analysis offered by the Commentators to Cyril's metaphysics of the Incarnation to see how well it accounts for the precise terms of the Incarnational doctrine posited by Cyril. This study also endeavors to expound and evaluate the many previous (and heavily conflicting) scholarly accounts of Cyril's intellectual agenda. It outlines various cognitive gaps associated with the macro arguments of the different positions, which by and large have underestimated Cyril's philosophical acumen and ignored his own immediate academic context.
